Stroke must remain standard, and the crankshaft and associated connecting rods material is free. Multivalve cylinder heads are not permitted unless originally fitted as standard. Engine disposition and location must remain as standard and therefore no modifications to the base structure or chassis are allowed.

Superchargers and turbochargers are only permitted if fitted as a standard factory item in period. In this case the engine capacity will be multiplied by a factor of 1.7 to give the capacity of the supercharged or turbocharged engine. **This total capacity will determine the class in which the car will compete. Only the original type and size of turbo/super charger may be used, and only the original period method of boost control will be permitted. The Eligibility Scrutineer will measure and seal any such installation if felt necessary**

Fuel injection is only permitted if fitted as standard by the vehicle manufacturer during the vehicle manufacture period covered by this championship (pre 31<sup>st</sup> December 1979), and must be of the original manufacture ( or manufactured to the original specification and approved by the eligibility scrutineer), method of operation, and number of injectors.

- 5.7.4 Fuel system and fuel tank: location is free provided a firewall is provided between the driver and the fuel tank. All vehicles must use fuel pump as defined by the MSA.
